

1       **In the Specification**

2       Please replace the paragraph beginning on page 11, line 4, with the following:

3       Next, the partner site runs the key.exe file against all servers with a  
4       "/makecurrent" parameter to make the new key the current key by switching a  
5       registry key referred to as keycurrent to the new key version. ~~They~~ The registry  
6       [[my]] may also take the form of a config file, or any file in other systems. It also  
7       sets an expiration date on the previous current key equal to the current time plus a  
8       registry key value referred to as TimeWindow. Time window may be set equal to  
9       the reauthorization time, or any other desired time. It may also be set to zero to  
10      immediately begin exclusive use of the new current key to access the partner site.  
11      If no time window has been set, old keys are flushed every 24 hours or so if  
12      desired.
